On a zoning lot located entirely within the Special Union Square District, if residential portions of buildings are not connected to one another at any level and are deemed to be separate buildings pursuant to Section 23-82 (Building Walls regulated by Minimum Spacing Formula) the minimum distance between such residential building elements shall be in accordance with the provisions of Section 23-71 (Minimum Distance between Buildings on a Single Zoning Lot) or 60 feet, whichever is less.

#### 119-30 STREET WALL, HEIGHT AND SETBACK REGULATIONS

The location and height above curb level of the street wall of any development or enlargement shall be as shown in the District Plan (Appendix A). However, if a development or enlargement is adjacent to one or more existing buildings fronting on the same street line, the street wall of such development or enlargement shall be located neither closer to nor further from the street line than the front wall of the adjacent building which is closest to the same street line.

Street wall recesses are permitted below the level of the second story ceiling for subway stair entrances required under Section 119-50 (Off-Street relocation of a Subway Stair within the Special District). Such recesses shall be no longer than 15 feet and no deeper than 8 feet or the width or length of the relocated subway stair, whichever is greater.

Street wall recesses are also permitted below the level of the second story ceiling for building or store entrances only.

A sky exposure plane of 2.5 to 1 shall begin at a height above curb level of 125 feet on all streets within the Special District, except that on a narrow street beyond 100 feet from any street line opposite a public park or from the intersection of such narrow street with a wide street, the sky exposure plane shall begin at a height above curb level of 85 feet.

If, after the effective date of this resolution, any demolition or destruction occurs within the volume defined the requirements governing street wall height shall apply.

However if more than one *use* meets these criteria, the principal entrance to only one of them is required to be so located.
