Yard regulations in M1-6D Districts

In M1-6D Districts, the provisions of Section 43-20 (Yard Regulations) shall apply, except that #residential# portions of a #building# shall provide a #rear yard# with a minimum depth of 30 feet at any level not higher than the floor level of the lowest #story# containing #dwelling units# with a #window# opening upon such #rear yard#. On any #through lot# that is 110 feet or more in depth from #street# to #street#, a #rear yard equivalent# shall be provided within 15 feet of the centerline of the #through lot# or #through lot# portion. In the case of a #through lot# on which a #rear yard equivalent# is provided, the requirements of this Section shall apply as if such #rear yard equivalent# were two adjoining #rear yards#.

43-625

Height and setback in M1-6D Districts

In M1-6D Districts, the height and setback provisions of this Section shall apply to all #buildings#.

(a) Rooftop regulations

(1) Permitted obstructions

The provisions of Section 33-42 (Permitted Obstructions) shall apply to all #buildings#, except that elevator or stair bulkheads, roof water tanks, cooling towers or other mechanical equipment (including enclosures) may penetrate a maximum height limit or #sky exposure plane#, provided that either the product, in square feet, of the #aggregate width of street walls# of such obstructions facing each #street# frontage, times their average height, in feet, shall not exceed a figure equal to eight times the width, in feet, of the #street wall# of the #building# facing such frontage; or the #lot coverage# of all such obstructions does not exceed 20

percent of the #lot coverage# of the #building#, and the height of all such obstructions does not exceed 40 feet.

In addition, on #narrow streets#, a maximum base height or #sky exposure plane# may be penetrated pursuant to the following.

(i) Structural columns

Structural columns may penetrate a maximum height limit or #sky exposure plane#, provided that they are one story or less in height, have a #street wall# no greater than 30 inches in width, and are spaced not less than 15 feet on center.

(ii) Dormers

(a) On any #street# frontage, the aggregate width of all dormers at the maximum base height shall not exceed 60 percent of the length of the #street wall# of the highest #story# entirely below the maximum base height. For each foot of height above the maximum base height, the aggregate width of all such dormers shall be decreased by one percent of the #street wall# width of the highest #story# entirely below the maximum base height.

(b) The aggregate width of dormers at the maximum base height facing the #rear yard line# or #rear yard equivalent# shall not exceed 60 percent of the length of wall of the #building# facing a #rear yard line# at the highest #story# entirely below the maximum base height. For each foot of height above the maximum base height, the aggregate width of all such rear dormers shall be decreased by one percent of the width of the #building# wall facing the #rear lot line#, at the level of the highest #story# entirely below the maximum base height.

Where two rear setbacks are provided as set forth in paragraph (b)(3)(ii) of this Section, the aggregate width of rear dormers, measured separately within each setback, shall not exceed 60 percent of the length of #building# wall facing a #rear yard line# at the highest #story# entirely below each rear setback. For each foot of height that a dormer is above the level of a setback, the aggregate width of dormers within such setback shall be decreased by one percent of the width of the highest #story# entirely below such setback.

In the case of a #through lot# on which a #rear yard equivalent# is provided, the requirements of this Section shall apply as if such #rear yard equivalent# were two adjoining #rear yards#.

(2) Screening requirements for mechanical equipment

For all #developments# and #enlargements#, and conversions of non-#residential buildings# to #residences#, all mechanical equipment located on any roof of a #building or other structure# shall be fully screened on all sides. However, no such screening requirements shall apply to water tanks.

(b) Height and setback

(1) #Street wall# location

The #street wall# shall be located on the #street line# and extend along the entire #street# frontage of the #zoning lot# up to at least the minimum base height specified in paragraph (b)(2) of this Section. On the ground floor, recesses shall be permitted where required to provide access to the #building#, provided such recesses do not exceed three feet in depth as measured from the #street line#.

Above the level of the second #story#, up to 30 percent of the #aggregate width of street walls# may be recessed beyond the #street line#. However, no recesses shall be permitted within 20 feet of an adjacent #building# and within 30 feet of the intersection of two #street lines#.

(2) Base height

On #wide streets#, and on #narrow streets# within 50 feet of their intersection with a #wide street#, the #street wall# of a #building# shall rise without setback to a minimum base height of 125 feet and a maximum base height of 150 feet.

On #narrow streets#, beyond 50 feet of their intersection with a #wide street#, the #street wall# of a #building# shall rise without setback to a minimum base height of 85 feet and a maximum base height of 125 feet.

As an alternative, the minimum and maximum base heights applicable to a #wide street# may apply along a #narrow street# to a distance of 100 feet from a #wide street#.

(3) Required setbacks and maximum #building# heights

(i) Along #wide streets#

The provisions of this paragraph, (b)(3)(i), shall apply to #buildings#, or portions thereof, located on #wide streets# and on #narrow streets# within 100 feet of a #wide street#. The portion of such #building# above a height of 150 feet shall be set back from the #street wall# of the #building# at least 10 feet along a #wide street# and at least 15 feet along a #narrow street#, except such dimensions may include the depth of any permitted recesses in the #street wall#. The maximum height of such #buildings# shall be 290 feet. In addition, the gross area of each of either the highest two or three #stories# of such #building# shall not exceed 80 percent of the gross area of the #story# directly below such highest two or three #stories#.

(ii) Along #narrow streets#

The provisions of this paragraph, (b)(3)(ii), shall apply to #buildings#, or portions thereof, located on #narrow streets# beyond 100 feet of a #wide street#. No portion of such #building or other structure# shall penetrate a #sky exposure plane# which begins at a height of 125 feet above the #narrow street line# and rises over the #zoning lot# with a slope of four feet of vertical distance for every foot of horizontal distance. The maximum height of such #buildings# shall be 210 feet. However, any portion of such #building or other structure# that is located beyond 15 feet of the #street line# may penetrate such #sky exposure plane#, provided such portion does not exceed a height of 210 feet. In addition, the gross area of each of the top two #stories# of a #building# may not be greater than 80 percent of the gross area of the #story# directly below such top two #stories#.

In addition, for #buildings# containing #residences#, no portion of such #building# exceeding a height of 125 feet shall be nearer to a #rear yard line# than ten feet. Alternatively, a pair of setbacks may be provided in accordance with the following:

- (a) a setback of five feet from the #rear yard line# shall be provided between a height of 85 feet and 125 feet; and
- (b) a setback of ten feet from the #rear yard line# shall be provided between a height of 125 and 165 feet.

However the heights of such setbacks shall be vertically equidistant from a height of 125 feet.

In the case of a #through lot# on which a #rear yard equivalent# is provided, the requirements of this Section shall apply as if such #rear yard equivalent# were two adjoining #rear yards#.

(4) Maximum length of #building# wall

The maximum length of any #story# located entirely above a height of 150 feet shall not exceed 150 feet. Such length shall be measured in plan view by inscribing within a rectangle the outermost walls at the level of each #story# entirely above a level of 150 feet.

43-626

Courts in M1-6D Districts

Residential portions of #buildings# shall be subject to the court provisions applicable in R10 Districts as set forth in Section 23-80 (Court Regulations, Minimum Distance between Windows and Walls or Lot Lines and Open Area Requirements), inclusive.
