Re: Geosupport System Software Version 24.1 / Release 24A

To: All Geosupport System Users

**Geosupport System 2023 Year-End Usage Statistics**

Our goal is to provide a useful geocoding service to all Geosupport System users - mainframe, desktop, etc. We have been collecting statistics on three items: 1. Geosupport calls on OTI's mainframe (MVSP LPAR); 2. Downloads of Geosupport Desktop Edition; 3. User Feedback Tickets. We are glad to see activity in all areas and are therefore proud to report the following statistics for the 2023 calendar year:

<b>37,398,180,409</b>	Batch calls to Geosupport (OTI MVSP LPAR only)
<b>88,613,948</b>	CICS calls to Geosupport (OTI MVSP LPAR only)
<b>607</b>	Geosupport Desktop Edition™ downloads
<b>966</b>	Feedback Tickets Opened by DCP (requests for internal and external work)
<b>897</b>	Feedback Tickets Closed by DCP (requests completed by DCP)

**Geosupport System User Bulletin 24-01**

**Version 24.1 is scheduled to be promoted to the production CICS and batch regions on the OTI mainframe on or around February 25, 2024 - with Geosupport Release 24A files as a “coordinated” release. Version 24.1 and Release 24A are available now in the test region on the mainframe. Users are asked to carefully test this coordinated release soon after receiving this bulletin. All problems should be reported to DCP as soon as possible.**

To access the new software and data files in the mainframe test environment for batch processing, please make sure these load libraries are the first two lines in your list of STEPLIB DD cards (in order):

```
//STEPLIB DD DSN=A030.GEO.SUPPORT.TEST.PDSE.LOADLIB,DISP=SHR
// DD DSN=A030.GEO.SUPPORT.TEST.LOADLIB,DISP=SHR
```

To access CICS GOAT, please sign onto CSCTEST and use GOAT.

To test CICS applications in the CSCTEST region, please make sure the following load libraries are listed first in your list of CICS STEPLIB DD cards:

```
//STEPLIB   TOCMVSP.USER.GEOT.PDSE.LOADLIB
//          TOCMVSP.USER.GEOT.LOADLIB
```

**Please note that users who opt to make these changes to their JCL for testing purposes (only) should restore their previous JCL settings upon completion.**

This section includes important notifications about data as well as information about the enhancements included in the new version of software.

**Section 2:     Release 24A Street Name/Code Deletions, Changes and Additions**

This section informs users of all Street Name Dictionary (SND) modifications included in the release. Users are invited to provide comments on these modifications, or other data issues to: [GSS\\_Feedback@planning.nyc.gov](mailto:GSS_Feedback@planning.nyc.gov)

**Section 3:     Release 24A Tax Block, Tax Lot & BIN Counts (and Differences from Release 23D)**

This section reports to users the total tax block, lot and Building Identification Number (BIN) counts for Release 24A (with borough and NYC totals) and the differences from the previous release, 23D.

**Section 4:     Appendices**

These appendices include a table of Geosupport functions, a list of Geosupport return codes and messages, and other tables, listings, and reference information as applicable.

Geosupport Desktop Edition™ will be available for download from the agency's website on or around February 25, 2024. By subscribing to the RSS feed, users will be notified once the update is available. Users can subscribe here:

## **Section 1:           Release 24A Data and Software Version 24.1 Information**

### Sanborn Volume and Page Information

Please be informed that the Sanborn Volume and Page information returned in functions 1A, 2, BL, and BN of the Geosupport System has been deprecated, as no source data is available to maintain a reliable level of accuracy or currency. For now, the field will continue to exist and be populated with data; however, users are hereby advised of the obsolete nature of this data, and the plan to eliminate this field in a future release. Users that rely on retrieving this information from Geosupport should plan accordingly.

### Schedule for UPAD Releases Following Release 24A

The Updated PAD File (UPAD) contains updates to the PAD file since the last major Geosupport Release, in this case since Geosupport Release 23D. UPAD is released approximately every two weeks between major Geosupport releases. In the past it has been available on the OTI mainframe, in the web GOAT application, and for Geosupport Desktop Editions via install packages available for download from the DCP website. Starting with the last release of Geosupport (23D) it has been available via DCP's Geosupport webservice Geoservice.

Below is the schedule for UPAD 24A releases:

<u>UPAD Release</u>	<u>Date in Production</u>
24A1	March 8, 2024
24A2	March 22, 2024
24A3	April 5, 2024
24A4	April 19, 2024

## **SECTION 2:      RELEASE 24A STREET NAME / CODE DELETES, CHANGES, AND ADDITIONS**

Release 24A includes street name/code deletions, changes, and additions as well as changes to property-related, building-related, and other types of geography. **Many of the street name/code deletions, changes, and additions included in Release 24A are related to interstate highway nomenclature. These modifications were made to improve the highway-related names used by truck routing and other navigation applications at the local and state level.**

Users who store Geosupport street codes or certain other volatile geographic identifiers obtained from Geosupport, such as tax lot identifiers (Borough/Block/Lot or BBL) and/or Building Identification Numbers (BINs), segment identification numbers, or node identification numbers in their own application files should update those files to reflect changes contained in each Geosupport release. Users can accomplish such ‘re-synchronizing’ either by using the Geosupport ‘stand-alone’ batch utility program GBAT, or by means of a user-written batch program that calls Geosupport via its Application Programming Interface (API).

Re-synchronizing should be done as soon as possible after confirming the installation of the latest Geosupport release at the data center where the application runs. Users whose applications run at data centers other than the mainframe at the Office of Technology & Innovation (OTI) should verify that the latest release (in this case, Release 24A) has been installed before re-synchronizing, since the installation of new Geosupport releases at the non-OTI data centers is at the discretion of each facility.

Street code re-synchronizing in particular is important in applications that use stored street codes as a key to retrieve data from the application file by geographic location. To facilitate automated street code re-synchronizing, a special Geosupport file called the Street Code Change File is created with each new release of Geosupport (see *Geosupport User Programming Guide*, Section IV.4). The importance of re-synchronizing with each Geosupport release and the consequences to the application of failing to do so are also explained in *Geosupport User Programming Guide*, Section IV.4.

Enclosed for your review are lists of the Release 24A street name/code deletions, changes, and additions. These deletions are necessary to delete invalid names, while additions are necessary to add street names and street codes for new streets, and to add new alternative street names and street name spelling variants for existing streets. Street code changes are made to reflect necessary street name/code reassignments or to correct errors in the assignment of street codes to street names. A more detailed explanation of street name and street code changes can also be found in the *Geosupport System User Programming Guide*, Chapter IV. Please note that some names are added to a release in anticipation of adding the corresponding geography to a future release; therefore, some place names and street names may be unavailable in this release.

Please provide any comments on the street name/street code deletions, changes, or additions included in Release 24A to: [GSS\\_Feedback@planning.nyc.gov](mailto:GSS_Feedback@planning.nyc.gov)
