Re: Geosupport System Software Version 24.2 / Release 24B

To: All Geosupport System Users

**Geosupport System User Bulletin 24-02**

**Version 24.2 is scheduled to be promoted to the production CICS and batch regions on the OTI mainframe on or around May 5, 2024 - with Geosupport Release 24B files as a “coordinated” release. Version 24.2 and Release 24B are available now in the test region on the mainframe. Users are asked to carefully test this coordinated release soon after receiving this bulletin. All problems should be reported to DCP as soon as possible.**

To access the new software and data files in the mainframe test environment for batch processing, please make sure these load libraries are the first two lines in your list of STEPLIB DD cards (in order):

```
//STEPLIB DD DSN=A030.GEO.SUPPORT.TEST.PDSE.LOADLIB,DISP=SHR
// DD DSN=A030.GEO.SUPPORT.TEST.LOADLIB,DISP=SHR
```

To access CICS GOAT, please sign onto CSCTEST and use GOAT.

To test CICS applications in the CSCTEST region, please make sure the following load libraries are listed first in your list of CICS STEPLIB DD cards:

```
//STEPLIB TOCMVSP.USER.GEOT.PDSE.LOADLIB
// TOCMVSP.USER.GEOT.LOADLIB
```

**Please note that users who opt to make these changes to their JCL for testing purposes (only) should restore their previous JCL settings upon completion.**

If you have any technical questions, please contact [Geosupport\\_DL@planning.nyc.gov](mailto:Geosupport_DL@planning.nyc.gov).

Enclosed is the Geosupport System User Bulletin 24-02, which is comprised of **four** sections.

**Section 1:     Release 24B Data and Software Version 24.2 Information**

This section includes important notifications about data as well as information about the enhancements included in the new version of software.

**Section 2:     Release 24B Street Name/Code Deletions, Changes and Additions**

This section informs users of all Street Name Dictionary (SND) modifications included in the release. Users are invited to provide comments on these modifications, or other data issues to: [GSS\\_Feedback@planning.nyc.gov](mailto:GSS_Feedback@planning.nyc.gov)

**Section 3:     Release 24B Tax Block, Tax Lot & BIN Counts (and Differences from Release 24A)**

This section reports to users the total tax block, lot and Building Identification Number (BIN) counts for Release 24B (with borough and NYC totals) and the differences from the previous release, 23D.

**Section 4:     Appendices**

These appendices include a table of Geosupport functions, a list of Geosupport return codes and messages, and other tables, listings, and reference information as applicable.

Geosupport Desktop Edition™ will be available for download from the agency's website on or around May 5, 2024. By subscribing to the RSS feed, users will be notified once the update is available. Users can subscribe here: [http://www1.nyc.gov/assets/planning/rss/products\\_rss.xml](http://www1.nyc.gov/assets/planning/rss/products_rss.xml)  
A complete set of documentation is included with the free download of the software.

The most recent version of the Geosupport System User Programming Guide (UPG) is always available for viewing or download here: <https://nycplanning.github.io/Geosupport-UPG/>

## **Section 1:           Release 24B Data and Software Version 24.2 Information**

### Bug Fixes

A bug in CICS GOAT has been fixed, no longer truncating the From/To Street Names. Additionally, a bug in Function 2 with Node ID has been fixed, now correctly reading the APEQUIV file in cases where districts have been updated mid-cycle as part of release 24A1.

### Vacant Flag in Property-related Functions Fixes:

An inconsistency in the application of the Vacant flag in Property-related functions 1A, BL, and BN has been eliminated. If there are no BINs on a BBL, the Vacant Flag will show 'V'; otherwise, it will be blank.

### Sanborn Volume and Page Information

Please be informed that the Sanborn Volume and Page information returned in functions 1A, 2, BL, and BN of the Geosupport System has been deprecated, as no source data is available to maintain a reliable level of accuracy or currency. For now, the field will continue to exist and be populated with data; however, users are hereby advised of the obsolete nature of this data, and the plan to eliminate this field in a future release. Users that rely on retrieving this information from Geosupport should plan accordingly.

### WebGOAT Update

The welcome page of the web version of GOAT now displays information about the release, as well as a schedule for the UPAD file releases.

### Schedule for UPAD Releases Following Release 24B

The Updated PAD File (UPAD) contains updates made to the PAD file since it's last full quarterly release, in this case, Geosupport Release 24B. UPAD is deployed approximately every two weeks between quarterly Geosupport releases. UPAD can be accessed through OTI mainframe (CICS GOAT/BATCH applications), web GOAT application, and through Geosupport Desktop Editions (GDE) via install packages available for download from the DCP website. Starting with Geosupport release 24A, UPAD releases are now available via DCP's Geosupport webservice Geoservice.

Below is the schedule for UPAD 24B releases:

<u>UPAD Release</u>	<u>Date in Production</u>
24B1	May 17, 2024
24B2	May 31, 2024
24B3	June 14, 2024
24B4	June 28, 2024

## **SECTION 2:      RELEASE 24B STREET NAME / CODE DELETES, CHANGES, AND ADDITIONS**

Release 24B includes street name/code deletions, changes, and additions as well as changes to property-related, building-related, and other types of geography. **Many of the street name/code deletions, changes, and additions included in Release 24B are related to educational facility nomenclature. These modifications are part of a multi-cycle research effort to make additional city schools, both public and private, traceable in Geosupport to adhere to public safety protocols.**

Users who store Geosupport street codes or certain other volatile geographic identifiers obtained from Geosupport, such as tax lot identifiers (Borough/Block/Lot or BBL) and/or Building Identification Numbers (BINs), segment identification numbers, or node identification numbers in their own application files should update those files to reflect changes contained in each Geosupport release. Users can accomplish such 're-synchronizing' either by using the Geosupport 'stand-alone' batch utility program GBAT, or by means of a user-written batch program that calls Geosupport via its Application Programming Interface (API).

Re-synchronizing should be done as soon as possible after confirming the installation of the latest Geosupport release at the data center where the application runs. Users whose applications run at data centers other than the mainframe at the Office of Technology & Innovation (OTI) should verify that the latest release (in this case, Release 24B) has been installed before re-synchronizing, since the installation of new Geosupport releases at the non-OTI data centers is at the discretion of each facility.

Street code re-synchronizing in particular is important in applications that use stored street codes as a key to retrieve data from the application file by geographic location. To facilitate automated street code re-synchronizing, a special Geosupport file called the Street Code Change File is created with each new release of Geosupport (see *Geosupport User Programming Guide*, Section IV.4). The importance of re-synchronizing with each Geosupport release and the consequences to the application of failing to do so are also explained in *Geosupport User Programming Guide*, Section IV.4.

Enclosed for your review are lists of the Release 24B street name/code deletions, changes, and additions. These deletions are necessary to delete invalid names, while additions are necessary to add street names and street codes for new streets, and to add new alternative street names and street name spelling variants for existing streets. Street code changes are made to reflect necessary street name/code reassignments or to correct errors in the assignment of street codes to street names. A more detailed explanation of street name and street code changes can also be found in the *Geosupport System User Programming Guide*, Chapter IV. Please note that some names are added to a release in anticipation of adding the corresponding geography to a future release; therefore, some place names and street names may be unavailable in this release.

Please provide any comments on the street name/street code deletions, changes, or additions included in Release 24B to: [GSS\\_Feedback@planning.nyc.gov](mailto:GSS_Feedback@planning.nyc.gov)
