Re: Geosupport System Software Version 26.2/ Release 26B

To: All Geosupport System Users

Geosupport System User Bulletin 26-02

Version 26.2 is scheduled to be promoted to the production CICS and batch regions on the OTI mainframe on or around May 19, 2026 - with Geosupport Release 26B files as a “coordinated” release. Version 26.2 and Release 26B are available now in the test region on the mainframe. Users are asked to carefully test this coordinated release soon after receiving this bulletin. All problems should be reported to DCP as soon as possible.

To access the new software and data files in the mainframe test environment for batch processing, please make sure these load libraries are the first two lines in your list of STEPLIB DD cards (in order):

```
//STEPLIB DD DSN=A030.GEO.SUPPORT.TEST.PDSE.LOADLIB,DISP=SHR
// DD DSN=A030.GEO.SUPPORT.TEST.LOADLIB,DISP=SHR
```

To access CICS GOAT, please sign onto CSCTEST and use GOAT.

To test CICS applications in the CSCTEST region, please make sure the following load libraries are listed first in your list of CICS STEPLIB DD cards:

```
//STEPLIB TOCMVSP.USER.GEOT.PDSE.LOADLIB
// TOCMVSP.USER.GEOT.LOADLIB
```

Please note that users who opt to make these changes to their JCL for testing purposes (only) should restore their previous JCL settings upon completion.

If you have any technical questions, please contact Geosupport_DL@planning.nyc.gov.

Enclosed is the Geosupport System User Bulletin 26-02, which is comprised of **four** sections.

Section 1: Release 26B Data and Software Version 26.2 Information

Programming Changes in Version 26.2

No programming changes were introduced with version 26.2.

Sanborn Volume and Page Information

Please be informed that the Sanborn Volume and Page information returned in functions 1A, 2, BL, and BN of the Geosupport System has been deprecated, as no source data is available to maintain a reliable level of accuracy or currency. For now, the field will continue to exist and be populated with data; however, users are hereby advised of the obsolete nature of this data, and the plan to eliminate this field in a future release. Users that rely on retrieving this information from Geosupport should plan accordingly.

Schedule for UPAD Releases Following Release 26B

The Updated PAD File (UPAD) contains updates made to the PAD file since its last full quarterly release, in this case, Geosupport Release 26B. UPAD is deployed approximately every two weeks between quarterly Geosupport releases. UPAD can be accessed through OTI mainframe (CICS GOAT/BATCH applications), web GOAT application, and through Geosupport Desktop Editions (GDE) via install packages available for download from the DCP website. Starting with Geosupport release 23B, UPAD releases are now available via DCP's Geosupport webservice Geoservice.

Below is the schedule for UPAD 26B releases:

<u>UPAD Release</u>	<u>Date in Production</u>
26B1	May 29, 2026
26B2	June 12, 2026
26B3	June 26, 2026
26B4	July 10, 2026
26B5	July 20, 2026

SECTION 2: RELEASE 26B STREET NAME / CODE DELETES, CHANGES, AND ADDITIONS

Release 26B includes street name/code deletions, changes, and additions as well as changes to property-related, building-related, and other types of geography. **Many of the street name/code deletions, changes, and additions included in Release 26B are related to educational facility nomenclature. These modifications are part of a multi-cycle research effort to make additional city schools, both public and private, traceable in Geosupport to adhere to public safety protocols.**

Users who store Geosupport street codes or certain other volatile geographic identifiers obtained from Geosupport, such as tax lot identifiers (Borough/Block/Lot or BBL) and/or Building Identification Numbers (BINs), segment identification numbers, or node identification numbers in their own application files should update those files to reflect changes contained in each Geosupport release. Users can accomplish such ‘re-synchronizing’ either by using the Geosupport ‘stand-alone’ batch utility program GBAT, or by means of a user-written batch program that calls Geosupport via its Application Programming Interface (API).

Re-synchronizing should be done as soon as possible after confirming the installation of the latest Geosupport release at the data center where the application runs. Users whose applications run at data centers other than the mainframe at the Office of Technology & Innovation (OTI) should verify that the latest release (in this case, Release 26B) has been installed before re-synchronizing, since the installation of new Geosupport releases at the non-OTI data centers is at the discretion of each facility.

Street code re-synchronizing in particular is important in applications that use stored street codes as a key to retrieve data from the application file by geographic location. To facilitate automated street code re-synchronizing, a special Geosupport file called the Street Code Change File is created with each new release of Geosupport (see *Geosupport User Programming Guide*, Section IV.4). The importance of re-synchronizing with each Geosupport release and the consequences to the application of failing to do so are also explained in *Geosupport User Programming Guide*, Section IV.4.

Enclosed for your review are lists of the Release 26B street name/code deletions, changes, and additions. These deletions are necessary to delete invalid names, while additions are necessary to add street names and street codes for new streets, and to add new alternative street names and street name spelling variants for existing streets. Street code changes are made to reflect necessary street name/code reassignments or to correct errors in the assignment of street codes to street names. A more detailed explanation of street name and street code changes can also be found in the *Geosupport System User Programming Guide*, Chapter IV. Please note that some names are added to a release in anticipation of adding the corresponding geography to a future release; therefore, some place names and street names may be unavailable in this release.

Please provide any comments on the street name/street code deletions, changes, or additions included in Release 26B to: GSS_Feedback@planning.nyc.gov
