

MapPLUTO 24v1 - Water Area Included

Tags Tax Lot, Parcels, DTM, PLUTO, MapPLUTO, boundaries

Summary

MapPLUTO contains extensive land use and geographic data at the tax lot level. MapPLUTO has over seventy data fields containing three basic types of data: tax lot characteristics, building characteristics, and geographic/political/administrative districts. This version is not clipped to the shoreline and contains lots completely or partially underwater.

Description

This dataset represents a compilation of data from various government agencies throughout the City of New York. The underlying geography is derived from the Tax Lot Polygon feature class that is part of the Department of Finance's Digital Tax Map (DTM). The tax lots have been clipped to the shoreline, as defined by NYCMap planimetric features. The attribute information is from the Department of City Planning's PLUTO data. The attribute data pertains to tax lot and building characteristics and geographic, political and administrative information for each tax lot in New York City. The Tax Lot Polygon feature class and PLUTO are derived from different sources. As a result, some PLUTO records do not have a corresponding tax lot in the Tax Lot polygon feature class at the time of release. These records are included in a separate non-geographic PLUTO Only table. There are a number of reasons why there can be a tax lot in PLUTO that does not match the DTM; the most common reason is that the various source files are maintained by different departments and divisions with varying update cycles and criteria for adding and removing records. The attribute definitions for the PLUTO Only table are the same as those for MapPLUTO. DCP Mapping Lots includes some features that are not on the tax maps. They have been added by DCP for cartographic purposes. They include street center 'malls', traffic islands and some built streets through parks. These features have very few associated attributes. To report problems, please open a GitHub issue or email DCPOpendata@planning.nyc.gov.

ESRI

Description of values

Coordinates defining the features.

Field Borough ►

Field description

The borough in which the tax lot is located. Two portions of the city, Marble Hill and Rikers Island, are each legally located in one borough but are serviced by different boroughs. The BOROUGH codes associated with these areas are the boroughs they are legally located in. Specifically, Marble Hill is serviced by the Bronx but is legally located in Manhattan and has a Manhattan BOROUGH code. Rikers Island has a Bronx BOROUGH code because it is legally located in the Bronx although it is serviced by Queens.

Field Block ►

Field description

The tax block in which the tax lot is located. This field contains a one to five-digit tax block number. Each tax block is unique within a borough (see BOROUGH).

Description source

Department of Finance - Property Tax System (PTS)

Description of values

Coordinates defining the features.

Field Lot ►

Field description

The number of the tax lot. This field contains a one to four-digit tax lot number. Each tax lot is unique within a tax block (see BLOCK).

Special Handling for condominiums:

In a condominium complex, each condominium unit is a separate tax lot and has its own lot number. In a residential condominium, the condominium units are generally the individual apartments; in a commercial condominium, the units might be floors in an office building, individual retail shops, or blocks of office space. These unit lot numbers have values between 1001 - 6999.

Each unit tax lot has an associated billing lot number, with values between 7501 - 7599. Lots in a condominium complex on the same block will have the same billing lot number. To max condominium information more compatible with parcel information, the Department of City Planning aggregates condominium unit tax lot information to the billing lot. For example, if a residential condominium building contains 20 units, the Department of Finance will assign 20 unit lot numbers and each of these lot numbers will have the same billing lot number. PLUTO will contain one record with the billing lot number and RESIDENTIAL UNITS will be set to 20.

If the Department of Finance has not yet assigned a billing lot number to the condominium complex, PLUTO uses the lowest unit lot number within the complex.

Note on MapPLUTO: The Department of Finance Digital Tax Map (DTM) contains the geography of the base lot for condominiums. The base lot is also called the "Formerly Known As" or FKA lot. For most condominium complexes, there is one base lot per billing lot. In using the DTM to create MapPLUTO, DCP replaces the base lot number with the billing lot number. If there is more than one base lot with the same billing lot number, DCP merges the base lots to create a geography for the billing lot.

Description source

Field CD ►

Field description

The community district (CD) or joint interest area (JIA) for the tax lot. The city is divided into 59 community districts and 12 joint interest areas, which are large parks or airports that are not considered part of any community district.

This field consists of three digits, the first of which is the borough code (see BORO CODE). The second and third digits are the community district or joint interest area number, whichever is applicable.

Two portions of the city, Marble Hill and Rikers Island, are legally located in one borough, but serviced by a different borough. The COMMUNITY DISTRICT associated with these areas is the community district by which they are serviced.

Marble Hill is legally located in Manhattan, but is serviced by the Bronx and is divided between community districts 207 and 208. Rikers Island is legally located in the Bronx, but is serviced by Queens and is part of community district 401.

COMMUNITY DISTRICT contains the value returned by Geosupport for one of the addresses assigned to the lot. If Geosupport does not return a value, COMMUNITY DISTRICT is calculated spatially using the tax lot's XY COORDINATES and DCP's Administrative District Base Map files.

Field CT2010 ►

Field description

The 2010 US census tract in which the tax lot is located. This field contains a one to four-digit census tract number, sometimes with a decimal point and a two-digit suffix.

2010 census tracts are geographic areas defined by the U.S. Census Bureau for the 2010 Census. Census tracts are comprised of census blocks. If a tax lot is split by a census tract boundary, only one census tract is retained.

Each census tract is unique within a borough (see Borough).

Examples:

Census Tract 203.01

Census Tract 23

CENSUS TRACT contains the value returned by Geosupport for one of the addresses assigned to the lot. If Geosupport does not return a value, CENSUS TRACT is calculated spatially using the tax lot's XY COORDINATES and DCP's Administrative District Base Map files.

Description source

Department of City Planning - Geosupport System; Department of City Planning – Administrative District Base Map files

Field CB2010 ►

Field description

The 2010 census block in which the tax lot is located.

This field contains a four-digit census block number and, when applicable, a one-character alphabetic suffix.

2010 census blocks are the smallest geographic areas defined by the U.S. Census Bureau. If a tax lot is split by a census block boundary, only one census block is retained.

Each census block number is unique within a census tract (see CENSUS TRACT).

Examples:

Census Block 101A

Census Block 102

CENSUS BLOCK contains the value returned by Geosupport for one of the addresses assigned to the lot. If Geosupport does not return a value, CENSUS BLOCK is calculated spatially using the tax lot's XY COORDINATES and DCP's Administrative District Base Map files.

Description source

Department of City Planning - Geosupport System; Department of City Planning – Administrative District Base Map files

Field SchoolDist ►

Field description

The school district in which the tax lot is located.

This field contains a two-digit school district number, which is preceded with a zero when the district number is one digit.

The city is divided up into 34 school districts. Those districts are then divided into smaller zones which determine the area served by local schools. Each district has its own superintendent and receives guidance from a Community District Education Council made up of parents and local representatives.

SCHOOL DISTRICT contains the value returned by Geosupport for one of the addresses assigned to the lot. If Geosupport does not return a value, SCHOOL DISTRICT is calculated spatially using the tax lot's XY COORDINATES and DCP's Administrative District Base Map files.

If a tax lot is split by a school district boundary, only one school district is retained.

Field Council ►

Field description

The city council district in which the tax lot is located.

This field contains a two-digit city council district number, which is preceded with a zero when the district number

is one digit.

There are currently 51 city council districts in the City, which serve as political districts for the legislative branch of city government. If a tax lot is split by a city council district boundary, only one city council district is retained.

CITY COUNCIL DISTRICT is calculated spatially using the tax lot's XY COORDINATES and DCP's Administrative District Base Map files, version 22C. This CITY COUNCIL DISTRICT is the district in effect through 12/31/23. It does not reflect the redistricting that followed the 2020 U.S. Census. It is not the district to use for the 2023 City Council election.

Description source

Department of City Planning - Geosupport System; Department of City Planning - Administrative District Base Map files

Field ZipCode ►

Field description

A ZIP code that is valid for one of the addresses assigned to the tax lot.

Note that a tax lot may have multiple addresses and these addresses may not have the same ZIP code. A building with entrances on two streets may have a different ZIP code for each street address. ZIP CODE may not be valid for the street address in ADDRESS.

If a tax lot does not have an ADDRESS or the ADDRESS contains a street name without a house number, ZIP CODE will be blank.

Description source

Department of City Planning – Geosupport System

Field FireComp ►

Field description

The fire company that services the tax lot.

This field consists of four characters, the first of which is an alphabetic code identifying the type of fire company, where E stands for Engine, L stands for Ladder and Q stands for Squad. The type code is followed by a one to three-digit fire company number which is preceded with leading zeros if the company number is less than three digits.

FIRE COMPANY contains the value returned by Geosupport for one of the addresses assigned to the lot. If Geosupport does not return a value, FIRE COMPANY is calculated spatially using the tax lot's XY COORDINATES and DCP's Administrative District Base Map files.

Field HealthArea ►

Field description

The health area in which the tax lot is located.

Health areas were originally created in the 1920s for the purpose of reporting and statistical analysis of public health data. They were based on census tracts and created to be areas of equal population. Health areas are contained within health center districts.

This field contains a four-digit health area number, which is preceded with leading zeros when the health area is less than four digits. There is an implied decimal point after the first two digits. If a tax lot is split by a health area boundary, only one health area is retained.

HEALTH AREA contains the value returned by Geosupport for one of the addresses assigned to the lot. If Geosupport does not return a value, HEALTH AREA is calculated spatially using the tax lot's XY COORDINATES and DCP's Administrative District Base Map files.

Field SanitSub ►

Field description
The subsection of the sanitation district that services the tax lot.

SANITATION SUBSECTION contains the value returned by Geosupport for one of the addresses assigned to the lot. If Geosupport does not return a value, SANITATION SUBSECTION is calculated spatially using the tax lot's XY COORDINATES and DCP's Administrative District Base Map files.

Description source
Department of City Planning - Geosupport System; Department of City Planning – Administrative District Base Map files

Field Address ►

Field description
An address for the tax lot.

Tax lots may be assigned a single house number on a street, a range of house numbers on a street, or addresses on multiple streets. ADDRESS contains the address in PTS, using the low number when there is a range of house numbers. Some tax lots, such as vacant lots or parks, have only a street name and no house number.

The general format is house number or low house number, if there is a house number range, and a space followed by a street name

A complete list of the addresses assigned to a tax lot is available through Geosupport or by downloading the Property Address Directory (PAD) from Bytes of the Big Apple™.

Most house numbers in Queens contain a hyphen.

Description source

Department of Finance - Property Tax System (PTS)

Field ZoneDist1 ►

Field description

The zoning district classification of the tax lot. Under the Zoning Resolution, the map of New York City is generally apportioned into three basic zoning district categories: Residence (R), Commercial (C) and Manufacturing (M), which are further divided into a range of individual zoning districts, denoted by different number and letter combinations. In general, the higher the number immediately following the first letter (R, C or M), the higher the density or intensity of land use permitted.

If the tax lot is divided by a zoning boundary line, ZONING DISTRICT 1 represents the zoning district classification occupying the greatest percentage of the tax lot's area. Only zoning districts that cover at least 10% of a tax lot's area are included.

For example: Tax lot 98 is divided by a zoning boundary line into part A and part B. Part A, the largest portion of the lot, is in a commercial zoning district, while part B is in a residential zoning district. ZONING DISTRICT 1 will contain the commercial zoning district associated with part A.

Tax lots that intersect with areas designated in NYC Zoning Districts as PARK, BALL FIELD, PLAYGROUND, and PUBLIC SPACE are assigned a single value of PARK in PLUTO. The NYC Zoning Districts do not constitute a definitive list of parks in the city. Lots designated as PARK should not be used to calculate the amount of open space in an area.

See SPLIT BOUNDARY INDICATOR to determine if the tax lot is divided.

Field ZoneDist2 ►

Field description

If the tax lot is divided by zoning boundary lines, ZONING DISTRICT 2 represents the zoning classification occupying the second greatest percentage of the tax lot's area. Only zoning districts that cover at least 10% of a tax lot's area are included.

If the tax lot is not divided by a zoning boundary line, the field is blank.

For example: Tax lot 98 is divided by a zoning boundary line into part A and part B. Part A, the larger portion of the lot, is in a commercial zoning district, while part B is in a residential zoning district. ZONING DISTRICT 2 will contain the residential zoning district associated with part B.

See SPLIT BOUNDARY INDICATOR to determine if the tax lot is divided.

Description source

List of values

Value Same as ZoneDist1

Field ZoneDist3 ►

Field description

If the tax lot is divided by zoning boundary lines, ZONING DISTRICT 3 represents the zoning classification occupying the third greatest percentage of the tax lot's area. Only zoning districts that cover at least 10% of a tax lot's area are included.

If the tax lot is not split between three zoning districts, the field is blank.

For example: Tax lot 98 is divided by zoning boundary lines into three sections - part A, part B and part C. Part A represents the largest portion of the lot, part B is the second largest portion of the lot, and part C covers the smallest portion of the tax lot. ZONING DISTRICT 3 will contain the zoning associated with part C.

See SPLIT BOUNDARY INDICATOR to determine if the tax lot is divided.

Description source

Value Same as ZoneDist1

Field ZoneDist4 ►

Field description

If the tax lot is divided by zoning boundary lines, ZONING DISTRICT 4 represents the zoning classification occupying the fourth greatest percentage of the tax lot's area. Only zoning districts that cover at least 10% of a tax lot's area are included.

If the tax lot is not split between four zoning districts, the field is blank.

For example: Tax lot 98 is divided by zoning boundary lines into four sections - part A, part B, part C and part D. Part A represents the largest portion of the lot, part B is the second largest portion of the lot, part C represents the third largest portion of the lot, and part D covers the smallest portion of the tax lot. ZONING DISTRICT 4 will contain the zoning associated with part D.

See SPLIT BOUNDARY INDICATOR to determine if the tax lot is divided.

Description source

Department of City Planning NYC GIS Zoning Features

List of values

Value Same as ZoneDist1

Field Overlay1 ►

Field description

The commercial overlay assigned to the tax lot. A commercial overlay is a C1 or C2 zoning district mapped within residential zoning districts to serve local retail needs (grocery stores, dry cleaners, restaurants, for example).

If more than one commercial overlay exists on the tax lot, COMMERCIAL OVERLAY 1 represents the commercial overlay occupying the greatest percentage of the lot area. The commercial overlay district must either cover at least 10% of a tax lot's area or at least 50% of the commercial overlay district must be contained within the tax lot.

If the tax lot is does not contain a commercial overlay, the field is blank.

See SPLIT BOUNDARY INDICATOR to determine if the tax lot is divided.

Description source

Department of City Planning NYC GIS Zoning Features

Field Overlay2 ►

Field description

A commercial overlay assigned to the tax lot.

If the tax lot has more than one commercial overlays, COMMERCIAL OVERLAY 2 represents the commercial overlay occupying the second largest percentage of the tax lot's area. The commercial overlay district must either cover at least 10% of a tax lot's area or at least 50% of the commercial overlay district must be contained within the tax lot.

If the tax lot is not divided by two commercial overlays the field is blank.

See SPLIT BOUNDARY INDICATOR to determine if the tax lot is divided.

Description source

Department of City Planning NYC GIS Zoning Features

Field SPDist1 ►

Field description

The special purpose district assigned to the tax lot. The regulations for special purpose districts are designed to supplement and modify the underlying zoning in order to respond to distinctive neighborhoods with particular issues and goals. Only special purpose districts that cover at least 10% of a tax lot's area are included.

If the tax lot is not in a special purpose district, the field is blank.

If more than one special purpose district exists on the tax lot, SPECIAL PURPOSE DISTRICT 1 represents the special purpose district occupying the greatest percentage of the lot area.

There are two exceptions:

- In the area of Manhattan covered by both the Special Midtown District and the Special Clinton District, SPECIAL

PURPOSE DISTRICT 1 is "CL" and SPECIAL PURPOSE DISTRICT 2 is "MiD".

- In the area of Manhattan covered by both the Special Midtown District and the Special Transit District, SPECIAL PURPOSE DISTRICT 1 is "MiD" and SPECIAL PURPOSE DISTRICT 2 is "TA".

See Appendix A for valid values.

See SPLIT BOUNDARY INDICATOR to determine if the tax lot is divided.

Description Special Willets Point District

Field SPDist2 ►

Field description

The special purpose district assigned to the tax lot. The regulations for special purpose districts are designed to supplement and modify the underlying zoning in order to respond to distinctive neighborhoods with particular issues and goals. Only special purpose districts that cover at least 10% of a tax lot's area are included.

If the tax lot is not divided by at least two special purpose districts, the field is blank.

If more than one special purpose district exists on the tax lot, SPECIAL PURPOSE DISTRICT 2 represents the special purpose district occupying the second greatest percentage of the lot area.

There are two exceptions:

- In the area of Manhattan covered by both the Special Midtown District and the Special Clinton District, SPECIAL PURPOSE DISTRICT 1 is "CL" and SPECIAL PURPOSE DISTRICT 2 is "MiD".
- In the area of Manhattan covered by both the Special Midtown District and the Special Transit District, SPECIAL PURPOSE DISTRICT 1 is "MiD" and SPECIAL PURPOSE DISTRICT 2 is "TA".

See Appendix A for valid values.

See SPLIT BOUNDARY INDICATOR to determine if the tax lot is divided.

Value Y

Description Lot is split.

Value N

Description Lot is not split.

Value (blank)
Description Unknown

Field BldgClass ►

Field description

A code describing the major use of structures on the tax lot.

Except as described below, BUILDING CLASS is taken from PTS without modification.

For condominiums, PTS contains the building class for each unit lot. When merging this data into a single record for the billing lot, DCP creates several mixed-use building classes (RC, RD, RI, RM, RX, and RZ). These are assigned as follows:

- If all unit lots have the same building class, that building class is used for the billing lot.
- PTS building class types are grouped as follows:
 - Commercial - R5, R7, R8, RA, RB, RH, and RK
 - Residential - R1, R2, R3, R4, R6, and RR
 - Mixed commercial and residential – R9
 - Industrial/warehouse - RW
- If the unit lots are a mixture of commercial building types, BUILDING CLASS = RC.
- If the unit lots are a mixture of residential building types, BUILDING CLASS = RD.
- If the unit lots are a mixture of commercial and residential building types, BUILDING CLASS = RM.
- If the unit lots are a mixture of commercial and industrial/warehouse building types, BUILDING CLASS = RI.
- If the unit lots are a mixture of commercial, residential, and industrial/warehouse building types, BUILDING CLASS = RX.
- If the unit lots are a mixture of residential and industrial/warehouse building types, BUILDING CLASS = RZ.
- When unit lots with a building class of RG (Indoor Parking), RP (Outdoor Parking), RS (Non-Business Storage Space), or RT (Terraces/Gardens/Cabanas) have the same billing lot as another building class, their building class is ignored. For example, if the billing lot has unit lots with a building class of R4 (Residential Unit in Elevator Bldg) and RG (Indoor Parking), BUILDING CLASS = R4.

Q0 is assigned by DCP to tax lots with an PTS building class starting with "V" that are identified in the NYC GIS Zoning Database as PARK, BALL FIELD, PLAYGROUND, or PUBLIC SPACE.

PTS contains two building classes for some tax lots, with one of the building classes being Z7 (Easement). BUILDING CLASS is only set to Z7 when it is the only PTS building class for the tax lot.

See Appendix C - Building Class Codes for valid values

Description Transportation and Utility

Value 08
Description Public Facilities and Institutions

Value 09
Description Open Space and Outdoor Recreation

Value 10
Description Parking Facilities

Value 11
Description Vacant Land

Field Easements ►

Field description
The number of unique easements on the tax lot.

PTS contains a record for each easement. NUMBER OF EASEMENTS is calculated by counting the number of

unique PTS easement records for the tax lot.

If the number of easements is zero, the tax lot has no easements.

Description source

Department of City Planning - based on data from: Department of Finance – Property Tax System (PTS)

Field OwnerType ►

Field description

A code indicating type of ownership for the tax lot.

Only one data source is used per tax lot.

The COLP file, which contains more accurate and specific type of city ownership data than PTS, is used when data is available for that lot. Codes C, M, O, P are derived from COLP.

If the tax lot is not in COLP, PTS is checked to see if the lot's EXEMPT TOTAL VALUE equals its ASSESSED TOTAL VALUE. If the two values are the same, the lot is given a code of X. Otherwise the tax lot is not given any TYPE OF OWNERSHIP CODE.

OWNER NAME should be referenced to verify type of ownership, particularly when it's important to distinguish between state, federal, and public authority ownership.

Description source

Department of City Planning - City Owned and Leased Properties (COLP); Department of Finance - Property Tax System (PTS)

List of values

Value C

Description City Ownership

Value M

Description Mixed City and Private Ownership

Value O

Description Other - Owned by either a public authority or the state or federal government

Value P

Description Private Ownership

Value X

Description Fully tax-exempt property that may be owned by the city, state, or federal government; a public authority; or a private institution

Value blank

Description Unknown (Usually Private Ownership)

Field OwnerName ►

Field description

The name of the owner of the tax lot.

For publicly owned tax lots, owner names have been normalized. For example, "NYC PARKS", "PARKS DEPARTMENT", and "PARKS AND RECREATION (GENERAL)" have been changed to "NYC DEPARTMENT OF PARKS AND RECREATION".

If OWNER NAME is normalized, DCPedited is set to "1".

Description source

Department of Finance - Property Tax System (PTS)

Field LotArea ►

Field description

Total area of the tax lot, expressed in square feet rounded to the nearest integer.

LOT AREA contains street beds when the tax lot contains "paper streets" i.e., street mapped but not built.

If the tax lot is not an irregularly shaped lot (see IRREGULAR LOT CODE) the Department of Finance calculates the LOT AREA by multiplying the LOT FRONTAGE by the LOT DEPTH. If the tax lot is irregularly shaped, DOF calculates the LOT AREA from the Digital Tax Map.

If PTS contains a zero value for LOT AREA, this field is changed to show the area of the tax lot's geometric shape in the Digital Tax Map and DCPedited is set to "1".

Description source

Department of Finance - Property Tax System (PTS)

Field BldgArea ►

Field description

The total gross area in square feet, except for condominium measurements which come from the Condo Declaration and are net square footage not gross.

TOTAL BUILDING FLOOR AREA is populated in the following order of preference:

1. Gross floor area from PTS
2. Gross floor area from CAMA
3. Calculated from the PTS building dimensions and number of stories for the primary building on the lot. TOTAL BUILDING FLOOR AREA calculated by this method will not include floor area for any other buildings on the lot.
4. TOTAL BUILDING FLOOR AREA is set to zero if the building class starts with "V" and the number of buildings is zero.

See TOTAL BUILDING FLOOR AREA SOURCE CODE to determine which method was used.

If TOTAL BUILDING FLOOR AREA SOURCE CODE has a value of 2 (PTS) or 7 (CAMA), the TOTAL BUILDING FLOOR AREA is based on gross building area, also known as total gross square feet. For these data sources, the TOTAL BUILDING FLOOR AREA is for all of the structures on the tax lot, including stairwells, halls, elevator shafts, attics and extensions such as attached garages. Measurements are based on exterior dimensions and take into account setbacks.

If the TOTAL BUILDING FLOOR AREA SOURCE CODE field has a value of 5, the floor area was calculated from the DOF Property Tax System (PTS) using the building dimensions and number of stories for ONLY the largest structure on the tax lot.

In all cases, this is a rough estimate of the gross building floor area and does not necessarily take into account all the criteria for calculating floor area as defined in section 12-10 of the Zoning Resolution.

Roof areas used for parking/garden/playground are not included in the floor area.

If TOTAL BUILDING FLOOR AREA SOURCE CODE is 2, TOTAL BUILDING FLOOR AREA contains the common area for condominiums.

If FLOOR AREA, TOTAL BUILDING SOURCE CODE is 7, TOTAL BUILDING FLOOR AREA does not include below grade finished basements.

If the basement in a one, two or three family structure is above grade and finished, its square footage is included in TOTAL BUILDING FLOOR AREA.

A TOTAL BUILDING FLOOR AREA of zero can mean it is either not available or not applicable. If NUMBER OF BUILDINGS is greater than zero, then a TOTAL BUILDING FLOOR AREA of zero means it is not available. If NUMBER OF BUILDINGS is zero, then a TOTAL BUILDING FLOOR AREA of zero means it is not applicable.

Description source

Department of City Planning based on data from: Department of Finance - Property Tax System (PTS); Department of Finance - Mass Appraisal System (CAMA)

Field ComArea ►

Field description

An estimate of the exterior dimensions of the portion of the structure(s) allocated for commercial use.

Value is taken from PTS, if available. When calculated from PTS data, COMMERCIAL FLOOR AREA is the sum of floor areas for office, retail, garage, storage, factory, and other uses. If these fields are not populated in PTS, the value is taken from CAMA.

Originally square footage came from sketches, but, for both new construction and alterations, it now comes from site visits.

Basement square footage may be included in COMMERCIAL FLOOR AREA if the commercial buildings meets two of the three following criteria:

- Finished
- Active
- Publicly accessible

For condominiums, COMMERCIAL FLOOR AREA is the sum of the commercial floor area for condominium lots with the same billing lot. COMMERCIAL FLOOR AREA does not contain the condominium's common area.

A COMMERCIAL FLOOR AREA of zero can mean it is either not available or not applicable.

An update to the floor area is triggered by the issuance of a Department of Buildings permit, feedback from the public, or site visits by Department of Finance assessors.

The sum of the various floor area fields does not always equal TOTAL BUILDING FLOOR AREA.

Description source

Department of Finance - Property Tax System (PTS), Mass Appraisal System (CAMA)

Field ResArea ►

Field description

An estimate of the exterior dimensions of the portion of the structure(s) allocated for residential use.

Value is taken from PTS, if available. Otherwise it comes from CAMA.

For condominiums, RESIDENTIAL FLOOR AREA is the sum of the residential floor area for condominium lots with the same billing lot. RESIDENTIAL FLOOR AREA does not contain the condominium's common area.

A RESIDENTIAL FLOOR AREA of zero can mean it is either not available or not applicable.

An update to the floor area is triggered by the issuance of a Department of Buildings permit, feedback from the public, or site visits by Department of Finance assessors.

The sum of the various floor area fields does not always equal TOTAL BUILDING FLOOR AREA.

Description source

Department of Finance - Property Tax System (PTS), Mass Appraisal System (CAMA)

Field OfficeArea ►

Field description

An estimate of the exterior dimensions of the portion of the structure(s) allocated for office use.

Value is taken from PTS, if available. Otherwise it comes from CAMA.

This information is NOT available for one, two or three family structures.

An OFFICE FLOOR AREA of zero can mean it is either not available or not applicable.

An update to the floor area is triggered by the issuance of a Department of Buildings permit, feedback from the public, or site visits by Department of Finance assessors.

The sum of the various floor area fields does not always equal TOTAL BUILDING FLOOR AREA.

Description source

Department of Finance - Property Tax System (PTS), Mass Appraisal System (CAMA)

Field RetailArea ►

Field description

An estimate of the exterior dimensions of the portion of the structure(s) allocated for retail use.

Value is taken from PTS, if available. Otherwise it comes from CAMA.

This information is NOT available for one, two or three family structures.

A RETAIL FLOOR AREA of zero can mean it is either not available or not applicable.

An update to the floor area is triggered by the issuance of a Department of Buildings permit, feedback from the public, or site visits by Department of Finance assessors.

The sum of the various floor area fields does not always equal TOTAL BUILDING FLOOR AREA.

Description source

Department of Finance - Property Tax System (PTS), Mass Appraisal System (CAMA)

Field GarageArea ►

Field description

An estimate of the exterior dimensions of the portion of the structure(s) allocated for garage use.

Value is taken from PTS, if available. Otherwise it comes from CAMA.

This information is NOT available for one, two or three family structures.

A GARAGE FLOOR AREA of zero can mean it is either not available or not applicable.

An update to the floor area is triggered by the issuance of a Department of Buildings permit, feedback from the public, or site visits by Department of Finance assessors.

The sum of the various floor area fields does not always equal TOTAL BUILDING FLOOR AREA.

Description source

Department of Finance - Property Tax System (PTS), Mass Appraisal System (CAMA)

Field StrgeArea ►

Field description

An estimate of the exterior dimensions of the portion of the structure(s) allocated for storage or loft purposes.

Value is taken from PTS, if available. Otherwise it comes from CAMA.

This information is NOT available for one, two or three family structures.

A STORAGE FLOOR AREA of zero can mean it is either not available or not applicable.

An update to the floor area is triggered by the issuance of a Department of Buildings permit, feedback from the public, or site visits by Department of Finance assessors.

The sum of the various floor area fields does not always equal TOTAL BUILDING FLOOR AREA.

Description source

Department of Finance - Property Tax System (PTS), Mass Appraisal System (CAMA)

Field FactoryArea ►

Field description

An estimate of the exterior dimensions of the portion of the structure(s) allocated for factory, warehouse or loft use.

Value is taken from PTS, if available. Otherwise it comes from CAMA.

This information is NOT available for one, two or three family structures.

A FACTORY FLOOR AREA of zero can mean it is either not available or not applicable.

An update to the floor area is triggered by the issuance of a Department of Buildings permit, feedback from the public, or site visits by Department of Finance assessors.

The sum of the various floor area fields does not always equal TOTAL BUILDING FLOOR AREA.

Description source

Department of Finance - Property Tax System (PTS), Mass Appraisal System (CAMA)

Field OtherArea ►

Field description

An estimate of the exterior dimensions of the portion of the structure(s) allocated for other than commercial, residential, office, retail, garage, storage, or factory use.

Value is taken from PTS, if available. Otherwise it comes from CAMA.

This information is NOT available for one, two or three family structures.

An OTHER FLOOR AREA of zero can mean it is either not available or not applicable.

An update to the floor area is triggered by the issuance of a Department of Buildings permit, feedback from the public, or site visits by Department of Finance assessors.

The sum of the various floor area fields does not always equal TOTAL BUILDING FLOOR AREA.

Description source

Department of Finance - Property Tax System (PTS), Mass Appraisal System (CAMA)

Field AreaSource ►

Field description

A code indicating the methodology used to determine the tax lot's TOTAL BUILDING FLOOR AREA (BldgArea)

Only one source is used per tax lot.

Description source

Department of City Planning

List of values

Value 0

Description Not Available

Value 2

Description Department of Finance's Property Tax System (PTS)

Value 4

Description BUILDING CLASS starts with "V" and NUMBER OF BUILDINGS is 0. TOTAL BUILDING FLOOR AREA is 0.

Value 5

Description Calculated from PTS building dimensions and NUMBER OF FLOORS for primary building only.

Value 7

Description Department of Finance's Mass Appraisal System (CAMA)

Field NumBldgs ►

Field description

The number of buildings on the tax lot.

The number of buildings on a lot is calculated by taking the Building Identification Number (BIN) for every building in DoITT's Building Footprints dataset, running Geosupport function BN to get the BBL associated with that BIN, and summing the number of buildings per tax lot.

Description source

Department of City Planning based on: Department of City Planning - GeoSupport System; Department of Finance - Property Tax System (PTS)

Field NumFloors ►

Field description

The number of full and partial floors starting from the ground floor, for the tallest building on the tax lot. A partial floor is a floor that does not span the entire building envelope. For example, if a building is 3 stories tall and 2 floors cover the entire footprint of the building and one floor covers half of the footprint, the number of floors

would be 2.5.

Above ground basements are not included in the NUMBER OF FLOORS.

A roof used for parking, farming, playground, etc. is not included in NUMBER OF FLOORS.

If the NUMBER OF FLOORS is null and the NUMBER OF BUILDINGS is greater than zero, then NUMBER OF FLOORS is not available for the tax lot.

Description source

Department of Finance - Property Tax System (PTS)

Field UnitsRes ►

Field description

The sum of residential units in all buildings on the tax lot.

If there are no residential units in the tax lot, this field will be zero.

Hotels/motels, nursing homes and SROs do not have residential units, but boarding houses do. Basement units for building superintendents are counted as a residential unit.

An update to residential units is triggered by the issuance of a Department of Buildings permit.

Description source

Department of Finance - Property Tax System (PTS)

Field UnitsTotal ►

Field description

The sum of residential and non-residential (offices, retail stores, etc.) units for all buildings on the tax lot.

The count of non-residential units is sometimes not available if the building contains residential units.

Non-residential units are units with a separate use. If a building has 25 different offices it would be counted as 1 unit because they have the same use.

Updates to residential and non-residential units are triggered by the issuance of a Department of Buildings permit.

Description source

Department of Finance - Property Tax System (PTS)

Field LotFront ►

Field description

The tax lot's frontage measured in feet.

NOTE: It appears that if a lot fronts on more than one street, the PTS building address often determines which side of the lot used for calculating lot frontage.

Description source

Department of Finance - Property Tax System (PTS)

Field LotDepth ►

Field description

The tax lot's depth measured in feet.

Description source

Department of Finance - Property Tax System (PTS)

Field BldgFront ►

Field description

The building's frontage along the street measured in feet.

Description source

Department of Finance - Property Tax System (PTS)

Field BldgDepth ►

Field description

The building's depth, which is the effective perpendicular distance, measured in feet.

Description source

Department of Finance - Property Tax System (PTS)

Field EXT ►

Field description

A code identifying whether there is an extension on the lot or a garage other than the primary structure.

Description source

Department of Finance - Property Tax System (PTS)

List of values

Value E

Description Extension

Value G

Description Garage

Value EG

Description Extension and garage

Value N

Description None

Field ProxCode ►

Field description

A code describing the physical relationship of the building to neighboring buildings. If there are multiple buildings on the lot, CAMA data for building number 1 is used.

Description source

Department of Finance - Mass Appraisal System (CAMA)

List of values

Value 0

Description Not Available

Value 1

Description Detached

Value 2

Description Semi-Attached

Value 3

Description Attached

Field IrrLotCode ►

Field description

A code indicating whether the tax lot is irregularly shaped.

Description source

Department of Finance - Property Tax System (PTS)

List of values

Value Y

Description Yes, an irregularly shaped lot

Value N

Description No, not an irregularly shaped lot

Value blank

Description Unknown

Field LotType ►

Field description

A code indicating the location of the tax lot in relationship to another tax lot and/or the water.

CAMA may contain multiple lot types for a tax lot. For instance, a lot may be both a corner lot and waterfront lot. DCP assigns LOT TYPE by taking the lowest CAMA lot type for the tax lot, with the exception of LOT TYPE 5, which is only assigned if the lot has no other lot types in CAMA.

Description source

Department of Finance - Mass Appraisal System (CAMA)

List of values

Value 0

Description Unknown

Value 1

Description Block Assemblage - A tax lot which encompasses an entire block.

Value 2

Description Waterfront - A tax lot bordering on a body of water. Waterfront lots may contain a small amount of submerged land.

Value 3

Description Corner - A tax lot bordering on two intersecting streets

Value 4

Description Through - A tax lot which connects two streets, with frontage on both streets. Note that a lot with two frontages is not necessarily a through lot. For example, an L-shaped lot with two frontages would be coded as an Inside Lot (5).

Value 5

Description Inside - A tax lot with frontage on only one street. This value comes from CAMA, but is only assigned in PLUTO if CAMA has no other lot types for the tax lot.

Value 6

Description Interior Lot - A tax lot that has no street frontage.

Value 7

Description Island Lot - A tax lot that is entirely surrounded by water.

Value 8

Description Alley Lot - A tax lot that is too narrow to accommodate a building. The lot is usually 12 feet or less in width.

Value 9

Description Submerged Land Lot - A tax lot that is totally or almost completely submerged.

Field BsmtCode ►

Field description

A code describing the building's basement.

This information is available for one, two or three family structures.

This information may also be available for commercial buildings if two of the following three criteria are met:

- Finished
- Active
- Publicly accessible

A value may exist for other types of property, but the data is not verified by DOF.

Basements in brownstones, high ranches, split-levels and attached row houses are considered above grade.

A fully exposed basement garage door does not, in itself, satisfy the criteria for above grade.

A cellar is below a basement and not habitable.

Description source

Department of City Planning - based on data from: Department of Finance - Mass Appraisal System (CAMA)

List of values

Value 0

Description None/No Basement

Value 1

Description Above grade full basement - the basement is 75% or more of the area of the first floor and the basement walls are at least 4 feet high on at least two sides.

Value 2

Description Below grade full basement - The basement is 75% or more of the area of the first floor and the basement walls are fully submerged or are less than 4 feet on at least three sides.

Value 3

Description Above grade partial basement - The basement is between 25% and 75% of the area of the first floor and the basement walls are at least 4 feet high on at least two sides.

Value 4

Description Below grade partial basement - The basement is between 25% and 75% of the area of the first floor and the basement walls are fully submerged or are less than 4 feet on at least three sides.

Value 5

Description Unknown

Field AssessLand ►

Field description

The assessed land value for the tax lot.

The Department of Finance calculates the assessed value by multiplying the tax lot's estimated full market land value, determined as if vacant and unimproved, by a uniform percentage for the property's tax class.

Assessed and exempt values are updated twice a year. Tentative values are released in mid-January and final values are released around May 25. If the date on source file (PTS), as reported in the Readme file, is between January 15 and May 25, ASSESSED LAND VALUE is from the tentative roll for the tax year starting in July. Otherwise, ASSESSED LAND VALUE is from the final roll.

Description source

Department of Finance - Property Tax System (PTS)

Field AssessTot ►

Field description

The assessed total value for the tax lot.

The Department of Finance calculates the assessed value by multiplying the tax lot's estimated full market value by a uniform percentage for the property's tax class.

Property value is assessed as of January 5th. If a new building is not completed by April 14th, the assessed building value is 0 and the Building Class reverts to Vacant.

Assessed and exempt values are updated twice a year. Tentative values are released in mid-January and final values are released around May 25. If the date on source file (PTS), as reported in the Readme file, is between January 15 and May 25, ASSESSED LAND VALUE is from the tentative roll for the tax year starting in July. Otherwise, ASSESSED LAND VALUE is from the final roll.

Description source

Department of Finance - Property Tax System (PTS)

Field ExemptTot ►

Field description

The exempt total value, which is determined differently for each exemption program, is the dollar amount related to that portion of the tax lot that has received an exemption.

Assessed and exempt values are updated twice a year. Tentative values are released in mid-January and final values are released around May 25. If the date on source file (PTS), as reported in the Readme file, is between January 15 and May 25, EXEMPT TOTAL VALUE is from the tentative roll for the tax year starting in July. Otherwise, EXEMPT TOTAL VALUE is from the final roll.

Note that New York State typically releases STAR exempt values right after the tentative roll is released. EXEMPT TOTAL VALUE will change to reflect these values after they are received.

Description source

Department of Finance - Property Tax System (PTS)

Field YearBuilt ►

Field description

The year construction of the building was completed.

In general, YEAR BUILT is accurate for the decade, but not necessarily for the specific year. Between 1910 and 1985, the majority of YEAR BUILT values are in years ending in 5 or 0. A large number of structures built between 1800s and early 1900s have a YEAR BUILT between 1899 and 1901.

For ~26,000 buildings in historic districts, YEAR BUILT has been changed to the date_high value from Landmarks Preservation Commission's Individual Landmark and Historic District Building Database. Any tax lot updated with LPC data has a value of 1 in field CHANGED BY DCP. The original YEAR BUILT value can be found in PLUTOChangeFileYYv#.#.csv, where YYv#.## is the version number.

If Year Built is null or 0, then the value is unknown.

Description source

Department of Finance - Property Tax System (PTS)

Field YearAlter1 ►

Field description

If a building has only been altered once, YEAR ALTERED 1 is the date that alteration began.

If a building has been altered more than once, YEAR ALTERED 1 is the year of the second most recent alteration.

The Department of Finance defines alterations as modifications to the structure that, according to the assessor, change the value of the real property.

The date comes from Department of Buildings permits and may either be the actual date or an estimate.

Description source

Department of Finance - Property Tax System (PTS)

Field YearAlter2 ►

Field description

If a building has only been altered once, this field is blank.

If a building has been altered more than once, YEAR ALTERED 2 is the year that the most recent alteration began.

The Department of Finance defines alterations as modifications to the structure that, according to the assessor, change the value of the real property.

The date comes from Department of Buildings permits and may either be the actual date or an estimate.

Description source

Department of Finance - Property Tax System (PTS)

Field HistDist ►

Field description

The name of the Historic District that the tax lot is within. Historic Districts are designated by the New York City Landmarks Preservation Commission.

Description source
Landmarks Preservation Commission Historic Districts dataset

Field Landmark ►

Field description

This value indicates whether the lot contains an individual landmark building, an interior landmark building, or both.

Description source
Landmarks Preservation Commission Individual Landmarks dataset

Field BuiltFAR ►

Field description

The BUILT FLOOR AREA RATIO is the total building floor area divided by the area of the tax lot.

This is an estimate by City Planning based on rough building area and lot area measurements provided by the Department of Finance. BUILT FLOOR AREA RATIO is calculated using the TOTAL BUILDING FLOOR AREA and the LOT AREA.

Description source
Department of City Planning – based on data from: Department of Finance - Property Tax System (PTS)

Field ResidFAR ►

Field description

The maximum allowable residential floor area ratio, based on the zoning district classification occupying the greatest percentage of the tax lot's area as reported in ZoneDist1. If the lot is assigned to more than one zoning district and ZoneDist1 does not allow residential uses, MAXIMUM ALLOWABLE RESIDENTIAL FAR is based on ZoneDist2, ZoneDist3 or ZoneDist4, in that order.

The maximum allowable residential floor area ratios are exclusive of bonuses for plazas, plaza-connected open areas, arcades, or other amenities.

For R2X, R3, R4, and C3 zoning districts, ResidFAR does not include the attic allowance, under which the FAR may be increased by up to 20% for the inclusion of space beneath a pitched roof.

For properties zoned R6, R7, R7-1, R8 or R9 the maximum allowable floor area reflects the maximum achievable floor area under ideal conditions.

The maximum allowable floor area does not reflect Voluntary Inclusionary Housing or Mandatory Inclusionary Housing Program floor area. See Appendix F and Section 23-154, paragraphs (b) and (d) of the Zoning Resolution.

For properties in special mixed use districts, PLUTO uses the wide street maximum allowable floor area ratio. Since the maximum allowable floor area ratio in mixed use special districts is actually determined by whether the property is located on a wide street or a narrow

Description source
Department of City Planning Zoning Division

Field CommFAR ►

Field description

The maximum allowable commercial floor area ratio, based on the zoning district classification occupying the greatest percentage of the tax lot's area as reported in ZoneDist1. If the lot is assigned to more than one zoning district and ZoneDist1 does not allow commercial uses, MAXIMUM ALLOWABLE COMMERCIAL FAR is based on ZoneDist2, ZoneDist3 or ZoneDist4, in that order.

The maximum allowable commercial floor area ratios are exclusive of bonuses for plazas, plaza-connected open areas, arcades, or other amenities.

Users should consult Section 43-12 of the Zoning Resolution for more information.

Description source

Department of City Planning Zoning Division

Field FaciFAR ►

Field description

The maximum allowable community facility floor area ratio, based on the zoning district classification occupying the greatest percentage of the tax lot's area as reported in ZoneDist1. If the lot is assigned to more than one zoning district and ZoneDist1 does not allow community facility uses, MAXIMUM ALLOWABLE COMMUNITY FACILITY FAR is based on ZoneDist2, ZoneDist3 or ZoneDist4, in that order.

The maximum allowable community facility floor area ratios are exclusive of bonuses for plazas, plaza-connected open areas, arcades, or other amenities.

Users should consult Section 24-11 of the Zoning Resolution for more information.

Description source

Department of City Planning Zoning Division

Field BoroCode ►

Field description

The borough in which the tax lot is located.

Two portions of the city, Marble Hill and Rikers Island, are legally located in one borough but are serviced by a different borough. The BORO CODEs associated with these areas are the boroughs in which they are legally located.

Marble Hill is serviced by the Bronx, but is legally located in Manhattan and has a BORO CODE of 1. Rikers Island is serviced by Queens, but is legally located in the Bronx and has a BORO CODE of 2.

Description source

Department of City Planning based on data from: Department of Finance - Property Tax System (PTS)

List of values

Value 1

Description Manhattan

Value 2

Description Bronx

Value 3

Description Brooklyn

Value 4

Description Queens

Value 5

Description Staten Island

Field BBL ►

Field description

A concatenation of the borough code, tax block and tax lot.

This field consists of the borough code followed by the tax block followed by the tax lot. The borough code is one numeric digit. The tax block is one to five numeric digits, preceded with leading zeros when the block is less than five digits. The tax lot is one to four digits and is preceded with leading zeros when the lot is less than four digits.

For condominiums, the BBL is for the billing lot. See TAX LOT for more information on how condominiums are handled.

Examples:

Manhattan Borough Code 1, Tax Block 16, Tax Lot 100 would be stored as 1000160100.

Brooklyn Borough Code 3, Tax Block 15828, Tax Lot 7501 would be stored as 3158287501.

Description source

Department of City Planning - based on data from: Department of Finance - Property Tax System (PTS)

Field CondoNo ►

Field description

The condominium number assigned to the complex.

Condominium numbers are unique within a borough (see BOROUGH).

Description source

Department of Finance - Property Tax System (PTS)

Field Tract2010 ►

Field description

This field contains a one to four-digit census tract number and a two-digit suffix. There is an implied decimal point between the census tract number and the suffix. The census tract number is preceded with leading zeros when the tract is less than four digits. If the tract has no suffix, CENSUS TRACT 2 contains 4 characters.

2010 census tracts are geographic areas defined by the U.S. Census Bureau for the 2010 Census.

Examples:

Census Tract 203.01 would be stored as 020301

Census Tract 23 would be stored as 0023

Description source

Department of City Planning – Geosupport System

Field XCoord ►

Field description

The X coordinate of the XY coordinate pair which depicts the approximate location of the lot.

The XY coordinates are expressed in the New York-Long Island State Plane coordinate system.

Description source
Department of City Planning- Geosupport System

Field YCoord ►

Field description

The Y coordinate of the XY coordinate pair which depicts the approximate location of the lot.

The XY coordinates are expressed in the New York-Long Island State Plane coordinate system.

Description source
Department of City Planning - Geosupport System

Field ZoneMap ►

Field description

The Department of City Planning Zoning Map Number associated with the tax lot's X and Y Coordinates. If the tax lot is on the border of two or more zoning maps, ZONING MAP # is the zoning map covering the greatest area.

Description source
Department of City Planning Georeferenced NYC Zoning Maps

Field ZMCode ►

Field description

A code (Y) identifies a tax lot on the border of two or more zoning maps.

Description source
Department of City Planning Georeferenced NYC Zoning Maps

Field Sanborn ►

Field description

The Sanborn Map Company map number associated with the tax block and lot.

SANBORN MAP # format is Borough Code/Volume Number/Page Number,
where Borough Code is 1 (Manhattan), 2 (Bronx), 3 (Brooklyn), 4 (Queens), or 5 (Staten Island)

For example: the SANBORN MAP # associated with tax block 154, tax lot 23 in Manhattan is 1/01S/020.

Description source
Department of City Planning - Geosupport System

Field TaxMap ►

Field description

The Department of Finance paper tax map volume number associated with the tax block and lot.

The first character of the Tax Map # is the Borough Code – 1 (Manhattan), 2 (Bronx), 3 (Brooklyn), 4 (Queens), or 5 (Staten Island). The second and third characters are the Section Number and the fourth and fifth characters are the Volume Number.

NOTE: The Department of Finance no longer updates their paper tax maps.

Description source

Field EDesignNum ►

Field description

The (E) designation number assigned to the tax lot. An (E) designation provides notice of the presence of an environmental requirement pertaining to potential hazardous materials contamination, high ambient noise levels or air emission concerns on a particular tax lot.

Note that a tax lot may have more than one (E) designation. See the source file for all designations on the lot.

Description source

Department of City Planning - E - Designation File

Field APPBBL ►

Field description

The originating BBL (borough, block and lot) from the apportionment prior to the merge, split or property's conversion to a condominium.

APPORTIONMENT BBL is only available for mergers, splits, and conversions since 1984.

Description source

Department of Finance - Property Tax System (PTS)

Field APPDate ►

Field description

The date of the apportionment.

The data is in the format MM/DD/YYYY, where MM is a two-digit month, DD is the two-digit day, and YYYY is the four-digit year.

Description source

Department of City Planning - based on data from: Department of Finance - Property Tax System (PTS)

Field PLUTOMapID ►

Field description

A code indicating whether the tax lot is in the PLUTO file, the MapPLUTO file with water areas included, and/or the MapPLUTO file that is clipped to the shoreline.

Because the Digital Tax Map (DTM) and the PTS Master File are not updated at the same time, they are slightly out-of-sync. There will be lots in PTS that are not in the DTM and vice versa. In addition, some lots are wholly underwater and are not included in the version of MapPLUTO that is clipped to the shoreline.

The lot geographies in MapPLUTO (with water areas included) are created from the DTM. City Planning modifies the DTM for condominium lots to show the billing tax lot in MapPLUTO, rather than the base tax lot. If there is more than one base tax lot with the same billing lot, the base tax lots are merged into a single feature and assigned to the billing lot. See LOT for more information on condominium lots.

MapPLUTO (clipped to shoreline) is created by clipping the full MapPLUTO using DOF's Shoreline File.

Description source

Department of City Planning - PLUTO Data File; Department of City Planning – MapPLUTO (water areas included); Department of City Planning – MapPLUTO (clipped to shoreline); Department of Finance - Digital Tax Map;

List of values

Value 1

Description Lot is in PLUTO and both versions of MapPLUTO

Description Lot is in PLUTO only.

Value 2

Description Lot is in both versions of MapPLUTO, but not in PLUTO

Value 3

Value 4

Description Lot is in PLUTO and MapPLUTO (with water areas included), but not in the clipped version of MapPLUTO. Tax lot is completely under water.

Description Lot is in MapPLUTO (with water areas included), but not in the clipped version of MapPLUTO or in PLUTO. Tax lot is completely under water.

Value 5

Field FIRM07_FLAG ►

Field PFIRM15_FLAG ►

Field Version ►

Field description

The version number for this release of PLUTO.

The Version Number is in the format YYv#.# where:

"YY" is the last two digits of the year;

"v" stands for version;

"#" is the release number for that year; and

".#" indicates an amendment to the original release, if applicable.

Description source

Department of City Planning

Field LtdHeight ►

Field description

The limited height district assigned to the tax lot. A limited height district is superimposed on an area designated as an historic district by the Landmarks Preservation Commission.

See Appendix B for valid values.

Description source

Department of City Planning NYC GIS Zoning Features

List of values

Value LH-1

Description Limited Height District No. 1 (Gramercy Park/Brooklyn Heights/Cobble Hill)

Value LH-1A

Description Limited Height District No. 1A (Upper East Side)

Value LH-2

Description Limited Height District No. 2

Value LH-3

Description Limited Height District No. 3

Field DCPedited ►

Field description

.Flag indicating that City Planning has applied a correction to the record.

Flag set to "1" if City Planning has made a change to any field values for this tax lot. To see which field(s) were changed, refer to the PLUTO_change_file_YYv#.#.csv, where YYv#. # is the version number. The change file contains the BBL; field name; old and new values; and the reason that the field was changed
