	New York City	
	Estimate	Margin of Error
Total:	963,295	+/-5,461
Asian Indian	230,476	+/-14,221
Bangladeshi	24,440	+/-5,002
Cambodian	3,005	+/-2,124
Chinese , except Taiwanese	431,829	+/-14,836
Filipino	68,147	+/-7,688
Hmong	0	+/-269
Indonesian	4,272	+/-1,831
Japanese	24,623	+/-4,261
Korean	98,102	+/-9,651
Laotian	259	+/-248
Malaysian	2,884	+/-1,887
Pakistani	27,532	+/-5,499
Sri Lankan	3,700	+/-1,593
Taiwanese	2,788	+/-907
Thai	4,155	+/-1,557
Vietnamese	14,624	+/-3,198
Other Asian	13,267	+/-2,803
Other Asian, not specified	9,192	+/-2,954

Source: U.S. Census Bureau, 2006 American Community Survey

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see [Accuracy of the Data](#)). The effect of nonsampling error is not represented in these tables.

Total includes people who reported Asian only, regardless of whether they reported one or more detailed Asian group.

Other Asian includes people who reported one detailed Asian group not shown separately and people who reported two or more specified Asian groups (and no other race).

The Other Asian, not specified includes people who checked the "Other Asian" only response category on the census questionnaire or wrote in generic terms such as "Asian," "Oriental," "Asiatic," and so forth.

While the 2006 American Community Survey (ACS) data generally reflect the December 2005 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas, in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '****' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
